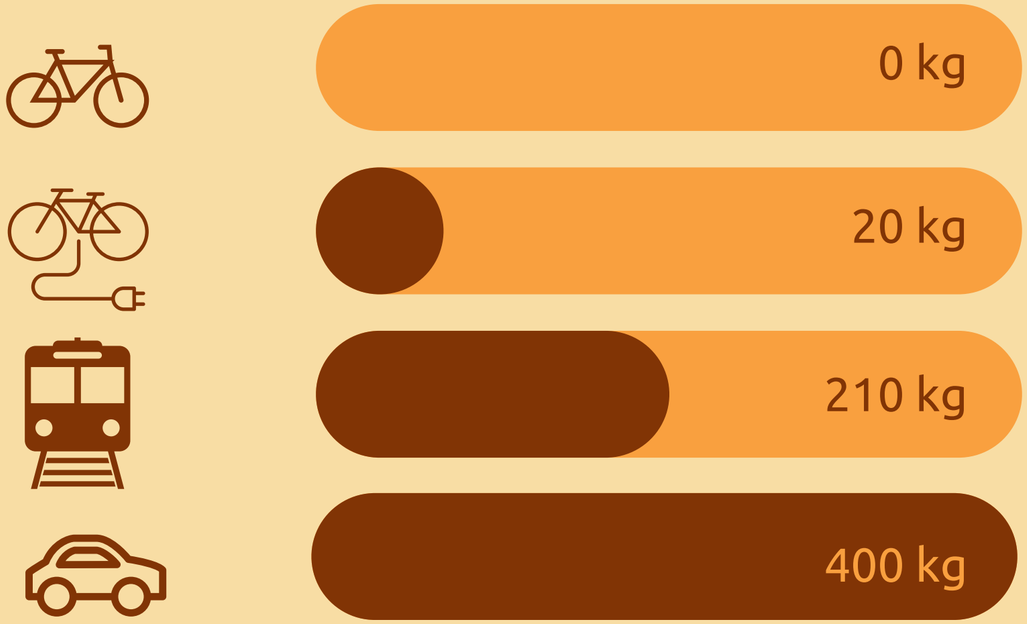
Transport

ACRIC
Active Citizens Reimagining the Community

approximate carbon emission per year



* commute of 9.6 km within the city, 230 working days per year, 7.8 litres fuel consumption (petrol), direct emissions
source: www.mein-klimaschutz.de/unterwegs

Explore

- Take a look at the graphic on this card. It illustrates the average CO2 emissions of the different means of transport.

- Which means of transport do you usually use?
- How much do you pollute the environment?
- What alternative would you have?

Active Citizens Reimagining the Community

Become active

Become active yourself and reduce your CO2 emissions. Use your bike for a week and check how much CO2 you have saved compared to the mode of transport you would normally use.

Go to:
www.cyclescheme.co.uk/health-calculator

Share your knowledge

You could keep a cycling diary and inspire others to switch to greener transport too. Let others know how much CO2 you have saved.
